Turbine Aerodynamics: Axial-Flow and Radial-Inflow Turbine Design and Analysis

Table Of Contents

Preface

1.0 Introduction
- **1.1 Basic Turbine Configurations**
- **1.2 Radial-Inflow and Axial-Flow Turbine Features**
- **1.3 Velocity Diagrams for a Stage**
- **1.4 Similitude and Performance Characteristics**
- **1.5 Units and Conventions**

2.0 Thermodynamics
- **2.1 First and Second Laws of Thermodynamics**
- **2.2 Efficiency**
- **2.3 Fluid Equation-of-State Fundamentals**
- **2.4 The Caloric Equation of State**
- **2.5 Entropy and the Speed of Sound**
- **2.6 The Thermal Equation of State for Real Gases**
- **2.7 Thermodynamic Properties of Real Gases**
- **2.8 Thermally and Calorically Perfect Gases**
- **2.9 The Pseudo-Perfect Gas Model**
- **2.10 Liquid-Phase Properties**
- **2.11 Gas Viscosity**
- **2.12 Component Performance Parameters**
- **2.13 A Computerized Equation of State Package**

3.0 Fluid Mechanics
- **3.1 Flow in a Rotating Coordinate System**
- **3.2 Adiabatic Inviscid Compressible Flow**
- **3.3 Adiabatic Inviscid Compressible Flow Applications**
- **3.4 Boundary Layer Analysis**
- **3.5 Two-Dimensional Boundary Layer Analysis**
- **3.6 Axisymmetric Three-Dimensional Boundary Layer Analysis**
- **3.7 Vector Operators in Natural Coordinates**

4.0 Empirical Performance Models for Axial-Flow Turbine Blade Rows
- **4.1 Blade Row Geometry**
- **4.2 Fluid Deviation Angle**
- **4.3 Overview of the Loss System**
- **4.4 Profile Loss Coefficient**
- **4.5 Secondary Flow Loss Coefficient**
- **4.6 Trailing-Edge Loss Coefficient**
- **4.7 Shock loss Coefficient**
- **4.8 Supersonic Expansion Loss Coefficient**
- **4.9 Blade Clearance Loss Coefficient**
- **4.10 Lashing Wire Loss Coefficient**
- **4.11 Leakage Bypass Loss**
- **4.12 Partial Admission Loss**
- **4.13 Disk Friction Loss**
- **4.14 Clearance Gap Windage Loss**
- **4.15 Moisture Loss**

5.0 Aerodynamic Performance Analysis of Axial-Flow Turbines
- **5.1 The Meridional Coordinate System**
- **5.2 The Approximate Normal Equilibrium Model**
- **5.3 Inviscid Adiabatic Flow on A Quasi-Normal**
- **5.4 Linking Quasi-Normals**
- **5.5 The Flow Profiles on a Quasi-Normal**
- **5.6 Turbine Performance Analysis**
- **5.7 Typical Performance Analysis Results**
- **5.8 Diaphragm-Disk Rotor Leakage Flows**
- **5.9 Blade Forces and Rotor Thrust**
- **5.10 Concluding Remarks**

6.0 Preliminary Aerodynamic Design of Axial-Flow Turbine Stages
- **6.1 Preliminary Aerodynamic Design Strategy**
- **6.2 Velocity Triangles at the Design Radius**
- **6.3 The Vortex Type and Swirl Velocity Distributions**
- **6.4 Stage Efficiency**
- **6.5 The Optimum Pitch-To-Chord Ratio**
- **6.6 Initializing the Total Thermodynamic Conditions**
- **6.7 The Stage Inlet Flow Profiles**
- **6.8 Sizing the Annulus**
- **6.9 Selecting the Blade Row Geometry**
- **6.10 A Computerized Preliminary Design System**
- **6.11 Selection of the Dimensionless Performance Parameters**
- **6.12 Selection of the Swirl Velocity Vortex Type**
- **6.13 Concluding Remarks**

7.0 Detailed Airfoil Design for Axial-Flow Turbines
- **7.1 Definition of the Airfoil Geometry**
- **7.2 The Airfoil Profile Model**
- **7.3 Determining the Polynomial Coefficients**
- **7.4 Leading and Trailing Edge Profiles**
- **7.5 The Passage Throat Calculation**
- **7.6 Adjusting the Uncovered Turning**
- **7.7 Design of a Complete Blade**
- **7.8 The Optional Defining Points**
- **7.9 Evaluation of the Airfoil Design**
- **7.10 A Computerized Airfoil Design System**

8.0 Industrial Axial-Flow Turbine Application Procedures
- **8.1 Stage Performance Rating Curves**
- **8.2 Reynolds Number Effects**
- **8.3 Reaction Rating Curves**
- **8.4 Application Procedures Based On Rating Curves**

9.0 Aerodynamic Performance Analysis of Radial-Inflow Turbines
- **9.1 Radial-Inflow Turbine Stage Geometry**
- **9.2 Boundary Layer Analysis**
- **9.3 The Boundary Layer Loss Coefficient**
- **9.4 Inlet Volute Analysis**
- **9.5 Nozzle Row Analysis**
- **9.6 Rotor Analysis**
- **9.7 Vaneless Annular Passage Analysis**
- **9.8 Exhaust Diffuser Analysis**
- **9.9 Imposed Total Pressure Loss**
- **9.10 Inlet Station Analysis**
- **9.11 The Performance Analysis Strategy**
- **9.12 Mass Balance Procedures**
- **9.13 Sub-Critical Performance Analysis**
- **9.14 Super-Critical Performance Analysis**
- **9.15 Typical Performance Analysis Results**

10.0 Preliminary Aerodynamic Design of Radial-Inflow Turbine Stages
- **10.1 Preliminary Aerodynamic Design Strategy**
- **10.2 Rotor Tip Sizing**
- **10.3 Rotor Design Specifications**
- **10.4 Rotor Sizing**
- **10.5 Evaluating the Rotor Design**
- **10.6 Rotor End-Wall Contours**
- **10.7 Straight-line Element Rotor Blade Camberlines**
- **10.8 Radial Element Rotor Blade Camberlines**
- **10.9 Nozzle Blade Geometry**
- **10.10 Nozzle Row Sizing**
- **10.11 Evaluating the Nozzle Design**
- **10.12 Initial Estimates of the Nozzle Design Specifications**
- **10.13 Volute Preliminary Design**
- **10.14 Exhaust Diffuser Sizing**
- **10.15 A Typical Preliminary Design Example**
- **10.16 A Computerized Preliminary Design System**

11.0 Detailed Aerodynamic Design of Radial-Inflow Turbine Components
- **11.1 Nozzle Blade Detailed Design**
- **11.2 A General Approach to Gaspath Detailed Design**
- **11.3 Useful Curve Forms**
- **11.4 Constructing the Annulus and Quasi-Normals**
- **11.5 Constructing the Blade Camberline**
- **11.6 Constructing the Blade Surfaces**
- **11.7 The Blade Passage Throat Geometry**
- **11.8 An Effective Gaspath Design System**
- **11.9 Application to Impeller Design**

12.0 Aerodynamic Design and Performance Analysis of Exhaust Diffusers
- **12.1 Basic Diffuser Technology**
- **12.2 An Approximate Performance Analysis**
- **12.3 Sizing the Exhaust Diffuser**
- **12.4 A Detailed Aerodynamic Performance Analysis**

13.0 Two-Dimensional Analysis of the Flow in the Blade-To-Blade Plane
- **13.1 The Blade-to-Blade Flow Problem**
- **13.2 Coordinate System and Velocity Components**
- **13.3 The Potential Flow Solution Procedure**
- **13.4 A Linearized Potential Flow Procedure**
- **13.5 The Time-Marching Solution Procedure**
- **13.6 Blade Surface Boundary Layer Analysis**
- **13.7 Summary**

14.0 Quasi-Three-Dimensional Blade Passage Flow Field Analysis
- **14.1 Quasi-Three-Dimensional Flow**
- **14.2 The Quasi-Normal Coordinate System**
- **14.3 Numerical Integration of the Governing Equations**
- **14.4 Repositioning the Stream Surfaces**
- **14.5 The Hub-To-Shroud Flow Analysis**
- **14.6 Coupling the Two Basic Flow Analyses**
- **14.7 Boundary Layer Analysis**
